PROFESSIONAL SUMMARY

Detail-oriented and analytical B.Tech student in Artificial Intelligence with hands-on experience in Data Analysis, Machine Learning, and predictive modeling. Skilled in Python, SQL, Excel, and Power BI for extracting insights from structured datasets. Experienced in Exploratory Data Analysis (EDA), data cleaning, and building machine learning models using Scikit-learn and Pandas. Seeking an entry-level Data Analyst / Data Science role to leverage data-driven insights for business decision-making.

TECHNICAL SKILLS

Programming	Python, SQL
Data Analysis & Visualization	Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI
Machine Learning & AI	Supervised Learning, Regression, Classification, Predictive Modeling, Feature Engineering, Feature Selection, Model Evaluation, Confusion Matrix, Scikit-learn
Tools & Platforms	Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Streamlit, Tableau
Databases	MySQL, MongoDB
Core Skills	Data Cleaning, Data Wrangling, EDA, Statistical Analysis, A/B Testing, Business Intelligence (BI), KPIs, Dashboard Development, ETL / Data Pipeline, Stakeholder Reporting, Analytical Thinking, Problem Solving

INTERNSHIP EXPERIENCE

Data Science & Analytics Intern Graphura India Pvt. Ltd. (Remote)	<i>Dec 2025 – Feb 2026</i>
- Developed influencer lead scoring and social media content performance prediction models using Python and Scikit-learn; applied feature engineering and model evaluation techniques to improve classification accuracy. - Built end-to-end ML pipelines including data preprocessing, feature selection, and model evaluation using confusion matrix, precision, and recall metrics; delivered data-driven insights to support business decision-making. - Visualized analytical findings using Matplotlib and Seaborn; created performance dashboards to track KPIs and communicate results to stakeholders.	
Data Science Intern Codec Technologies Pvt. Ltd. (Remote)	<i>Aug 2025 – Oct 2025</i>
- Performed data wrangling and EDA on subscription datasets using Pandas and NumPy; identified key churn indicators and behavioral patterns through statistical analysis and correlation mapping. - Built a customer churn prediction model using Logistic Regression and Random Forest algorithms; evaluated model performance using accuracy, recall, and F1-score metrics to support retention strategy. - Prepared and presented data insights via charts and summary reports, enabling stakeholder reporting on subscription trends and churn risk segments.	

PROJECTS

</

EDUCATION

B.Tech – Artificial Intelligence JD College of Engineering & Management	<i>CGPA: 8.49 2022 – 2026</i>
---	---------------------------------

CERTIFICATIONS

- OCI Data Science Professional – Oracle (2025–2027)
- OCI Generative AI Professional – Oracle (2025–2027)
- Introduction to Machine Learning – NPTEL (Jul–Oct 2025)
- Python 101 for Data Science – IBM (2025)
- Career Essentials in Business Analysis – Microsoft & LinkedIn (2025)
